## SUMMARY

---

Cross-functional operator with 10+ years experience across product, growth, and operations in competitive markets. As Founding COO at KOMPETE (Modernize Games), I led the design, go-to-market, and operation of a live game economy and marketplace that scaled to over \$100M in trade volume. My work centers on building useful products, bringing them to market effectively, and designing systems that scale, reflecting my evolution from roots in growth marketing to product and operational leadership. I'm currently involved in the early buildout of Outpost, a pediatric therapy venture.
